MANPOWER AND EMPLOYMENT STATISTICS PUBLICATIONS OF THE BUREAU OF LABOR STATISTICS-- A SELECTED BIBLIOGRAPHY

INTRODUCTION

The broad fields of manpower and human resources have grown so rapidly in recent years that it is difficult for the student or research worker to keep up with them. This bibliography of recent Bureau of Labor Statistics publications in the field of manpower and employment statistics has been developed to assist government, labor and management officials, teachers and students who make use of BLS materials in decisionmaking, teaching, and research.

The listing is designed to present publications of current interest, and therefore, is concerned primarily with materials produced during the last 5 years (1963 to the present), but it does include materials published prior to that time that are considered to have continuing interest and usefulness. The bibliography is limited to those items produced and published by BLS, studies prepared by BLS personnel and published elsewhere, and articles by other authors published in BLS periodicals.

Publications listed may be obtained as follows:

Reports and releases for which no price is given may be obtained free, while available, from the Bureau of Labor Statistics, U. S. Department of Labor, Washington, D. C. 20212, or from any of its regional offices listed below.

Periodicals may be obtained from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

Bulletins and reports for which a price is indicated may be purchased from the Superintendent of Documents or from the BLS regional offices which have been designated as agents for the Superintendent of Documents.

A few "out of print" bulletins are listed. These are not available from the Superintendent of Documents but generally are available for reference purposes in leading public, college or university libraries, or in the Bureau's regional offices.
